

FF800 Systems

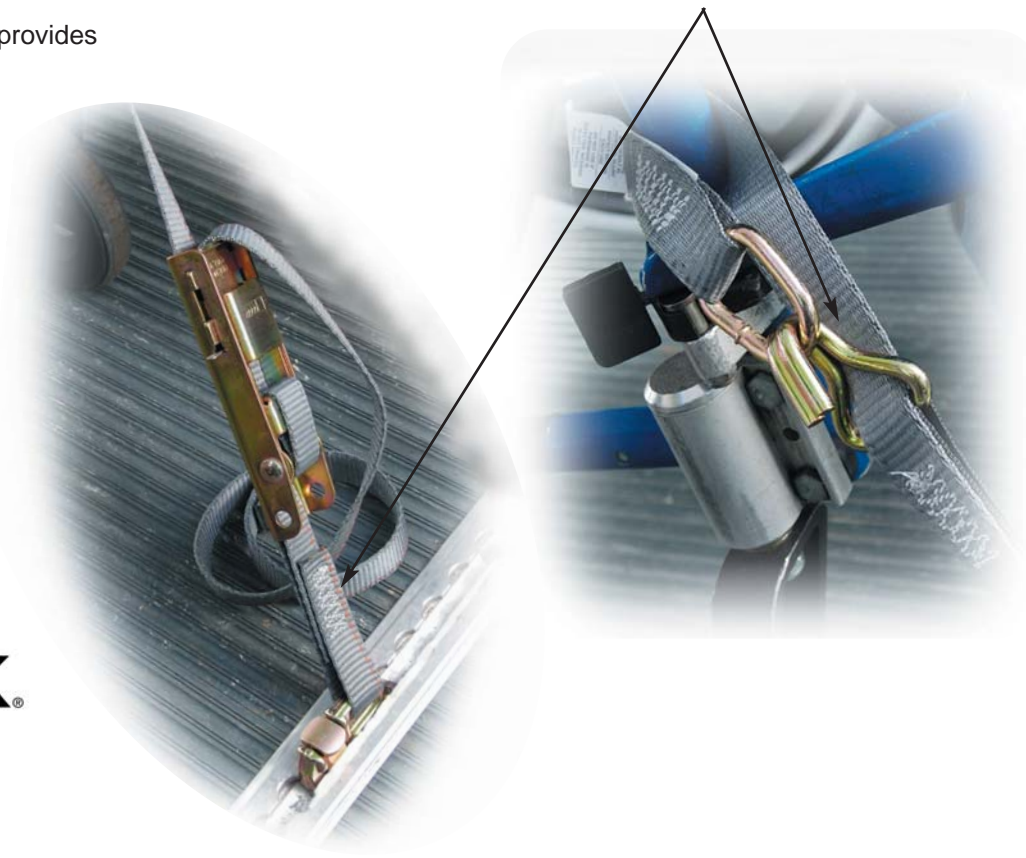

Our FF800 Series Systems can be summed up in one word: Proven.

Sure-Lok FF800 Series Systems were among the first wheelchair securement designs to be successfully used by transportation providers. These systems have been used in the field for more than 25 years, proving themselves beyond a shred of doubt. FF800 Systems are economical in price but uncompromising in quality. The same attention to detail that goes into making our advanced systems goes into manufacturing the FF800 Series. These designs offer demonstrated securement capabilities and are an economical alternative when the 30mph/20g Impact Test Criteria is not specified.

Each tie-down assembly has a minimum breaking strength of 2,500 pounds.

Safe and economical design provides proven securement.

Using the Wire-Hook and D-Ring configuration allows the webbing to conform to the structural frame of the wheelchair and prevents it from being scratched or dented.

FF800 Systems

Our FF800 Series Systems can be summed up in one word: Proven.

Tried-and-true system, used by transportation providers since 1975, adapts to a variety of wheelchair designs when 30mph/20g Impact Test Criteria is NOT a requirement.

When using a lap belt with the FF800 Series Systems, a parallel lap belt is required.

Standards Compliance

FF800 Series Systems are designed to meet or exceed the following requirements:

- 49 CFR Part 38 Americans with Disabilities Act (ADA)
- 49 CFR Part 571.222 (FMVSS 222) School Bus Passenger Seating and Crash Protection
- FMVSS 302 Flammability Test

Note: If a 30mph/20g Impact Test System is required, refer to the FF600 or FE500 Series Securement Systems.

Certificates of conformance available upon request.

FE500 & FF800 Applications

Sure-Lok's Wheelchair Tie-Downs and Occupant Restraint Systems can be used to secure a variety of wheelchair devices including the popular scooter.

We do not recommend using the scooter as a seat in a moving vehicle. The rider, scooter and the batteries shall be independently and properly restrained.
